

As a Satelite radio subscriber, I am all for Sat radio carrying Traffic and Weather. I honetly don't see the problem. I listen all types of radio AM, FM and Sat. and I don't plan on changing that anytime soon. When I am on my Sat. Radio, I don't think NAB has any right to dictate what I should listen to. I pay for that service and there are times when I need up to the minute traffic and weather. I may have to wait 30 minutes to hear of the traffic in the area I'm headed to, if I'm on regular radio. So please reject the Nab's petition 04 - 160.

Thank You,
Berry
